*Whitney Houston: "Our children are our future. Treat them well and let them lead the way..."*

Several teenagers and two 12 year old boys recently killed a female Uber driver delivering food. And 4 other boys attacked an off duty police officer attempting to rob him. Their race and culture hasn't been revealed, but does that matter. These youth did the most heartless thing...killing a mother of three working a part time job.

If we keep calling and labeling Black children as animals and savages without any understanding who they really are, they will embrace that label instead of rejecting it, they will become IT! They are called everything but HUMAN...even from their own mouths. This Exhibit attempts to characterize them with attributes that are full of possibilities and hope. This exhibit attempts to give them their HUMANITY back!
